

Australia's First High Performance Alkaline Water

ALKA POWER

IONIC ALKALINE WATER

Lets get hydrated!

The History...

In the past few years, the profitable bottled water industry has created an onslaught of beverages claiming to have AMAZING health benefits.

However, most flavoured, spring and filtered bottled waters are essentially pH neutral or acidic.

An initiative to conduct exhaustive research to develop the best Ionic mineral alkaline water on the market.

From this research, Alka Power was developed. Alka Power has the proper pH to sustain maximum hydration and help balance your body's pH level.

Further more, unlike other alkaline waters that lose their pH after bottling, our high pH of 9-10 is maintained from the time of bottling until the time you drink it!

Tricia and Anthony Rufus

A pH imbalance in the body is caused by consuming high acidic foods and beverages.

What we eat and drink can be easily classified along a scale from increasingly acidic or alkaline. The foods that tend to be more alkaline are those usually linked to better long-term health, such as green vegetables, certain fruits. Acidic foods and beverages are red meats, processed foods, alcohol, sports and sparkling soft drinks amongst others .

An alkaline state also comes as no surprise that these foods contribute to less disease and overall wellness.

Consuming acidic foods and beverages weakens the body's resolve and defences, thereby strengthening the possibility of diseases, such as cancer, heart disease, diabetes, etc. Endorsed

Why Alka Power?

High Performance Ionic alkaline water does more than quench your thirst.

More Energy. More Balance.

More Endurance.

More Hydration.

Better Health!

Get MORE from your water!

Most alkaline waters in the Australian market are of a **pH of 7 to 8.2** at the source. They have an **unstable pH**. They normally get their alkalinity from rock formations such as Limestone or Bi Carbonate of Soda. These are in-active minerals.

Alka Power has a **stable pH9-10** with active ionic minerals, that is nearly **1,000 times more** alkaline and more efficient in hydrating and absorption than any other.

No salt, no sugar, no preservatives or colouring are added to Alka Power!

Fast Benefits

Alka Power is the FIRST Ionic Calcium infused alkaline water on the Australian Market

- ✓ Super Hydrating and Detoxifying
- ✓ Increases Blood Flow
- ✓ Enhances Circulation & Metabolism
- ✓ Increases Energy
- ✓ Replenishes Essential Minerals
- ✓ Boosts Immune System
- ✓ Supports Anti-Oxidant/Anti-Aging
- ✓ Assists Weight Control

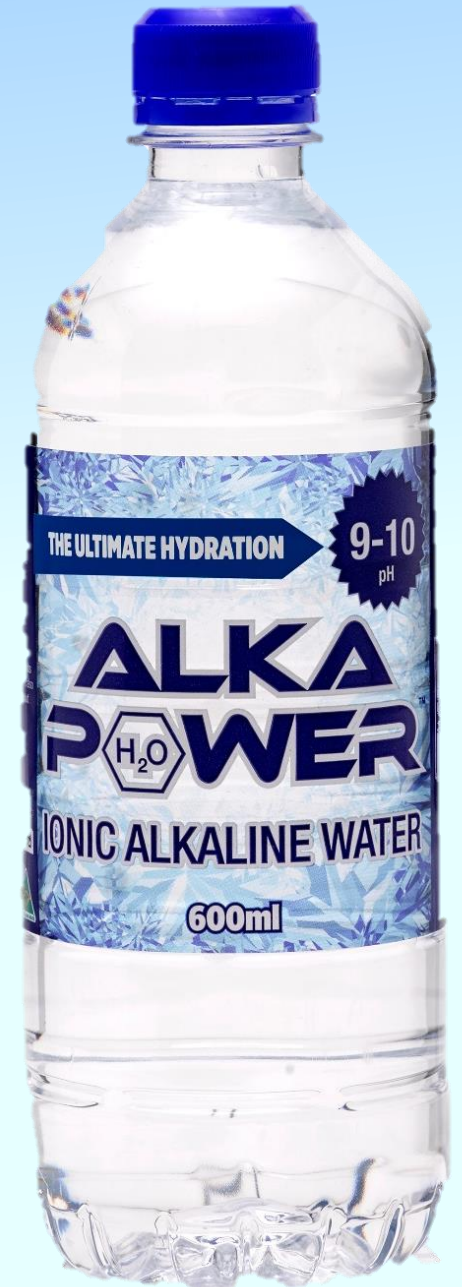

Alka Power comes in a 1.5 Litre and a 600ml Bottles with a 28mm neck for easier consumption

Israel Folau

Environmentally friendly

Alka Power is produced in a bottle that is BPA, BPF & BPS Free. Up to 50% of recycled PET goes into our bottles saving in raw materials which has a flow on effect on ECO- responsible production of our bottles

More than the competition

Alka Power offers **MORE**
than the competition!

- More endurance and better recovery
- Great taste! Described as smooth, clean, refreshing and pure
- Absolute purity
- Stable pH (9-10) guaranteed
- 100% natural ionic calcium-infused
- Australia's highest pH Alkaline water
- Ultimate hydration,

We thank you for taking the time
